

CORRECTION

Correction to: 2023 AHA/ACC/ACCP/ASPC/NLA/PCNA Guideline for the Management of Patients With Chronic Coronary Disease: A Report of the American Heart Association/American College of Cardiology Joint Committee on Clinical Practice Guidelines

In the article by Virani et al, “2023 AHA/ACC/ACCP/ASPC/NLA/PCNA Guideline for the Management of Patients With Chronic Coronary Disease: A Report of the American Heart Association/American College of Cardiology Joint Committee on Clinical Practice Guidelines,” which published ahead of print on July 20, 2023, and appeared in the August 29, 2023, issue of the journal (*Circulation*. 2023;148:e9–e119. doi: 10.1161/CIR.0000000000001168), a correction was needed.

On Page e57, section “4.3.4. Colchicine,” under the “Synopsis” heading, the last sentence read, “The dose of colchicine available in the United States for secondary prevention in patients with ASCVD is 0.6 mg daily, although the published studies use a dose of 0.5 mg daily.” This sentence has been updated to read, “Based on the dose tested in clinical trials, the recommended dose of colchicine for use in secondary prevention in patients with CCD is 0.5 mg daily.”

This correction has been made to the current online version of the article, which is available at: <https://www.ahajournals.org/doi/10.1161/CIR.0000000000001168>
